THE POWER OF TEN 2ND ED

A CONVERSATIONAL APPROACH TO TACKLING
THE TOP TEN PRIORITIES IN NURSING

SUSAN B. HASSMILLER & JENNIFER S. MENSIK

The Power of Ten, 2nd Edition

Susan B. Hassmiller & Jennifer S. Mensik

Focusing on the obstacles nurses face and challenging long-held beliefs that have stymied forward progress in the profession, authors Susan B. Hassmiller, PhD, RN, FAAN, and Jennifer S. Mensik, PhD, RN, NEA-BC, FAAN, surveyed more than 50 national and international nurse leaders to determine the most pressing issues in the profession today. From that feedback, the authors compiled a list of top 10 priorities for this all-new edition.

These priorities, illuminated through essays, action items, discussion points, and data, position nurses to set the stage for the future of nursing.

The authors' royalties from this book will be donated equally to American Red Cross nursing programs and the American Nurses Foundation.
